## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of Species I in the reply filed on 7/15/05 is acknowledged.

Claims 9-17 and 25-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/15/05.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6-8, 18, 20, and 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagata, US Patent 6,009,396. Nagata discloses a microphone array system comprising an array of microphones 1, frequency analysis unit 2, and sound source position search unit 3. Frequency analysis unit 2 is first means of decomposing the signals into a plurality of different frequency band signals. Sound source position search unit 3 is the third means for estimating the direction of signal sources. As shown in figure 9, Nagata accomplishes calculating cross correlation functions for determining the direction of signal sources. Claims 1, 8, 18, and 24 are met. As to claim 2, there is disclosed a band-pass filter bank in frequency analysis unit 2 (see column 5 lines 62-67). As to claims 4 and 20, step S4 in figure 9 discloses a

normalization step and step S5 accomplishes addition. Per claims 7 and 23, there is disclosed a sound source. As to claims 6 and 22, Nagata discloses in column 9 lines 45-63 the use of weighted addition to reduce the influence of noise.

### ***Allowable Subject Matter***

Claims 3, 5, 19, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chang et al, US Patent 6,469,732; Matsuo, US Patent 6,760,449.
